

ACLIMA

2022 Notable Impact Highlights

CANDIDE
GROUP

Overview

"Aclima is pioneering an entirely new way to diagnose the health of our air and track climate-changing pollution. Powered by our network of roving and stationary sensors, Aclima measures air pollution and greenhouse gases at unprecedented scales and block-by-block resolution. Our professional analytics software, Aclima Pro, translates billions of scientific measurements into environmental intelligence for governments, companies, and communities. Our free app, air.health, maps address-level air and climate insights for the communities we serve. Aclima is a purpose-driven technology company catalyzing bold climate action that protects public health, reduces emissions, and delivers clean air for all."

Founders

Leaders

Key Communities & Stakeholders

"Local communities in CA, NY and other regions we're deployed in most impacted by and vulnerable to air pollution and in need of good green jobs."

Workforce

Challenging "Business as Usual"

"Aclima's mobile measurement network is the first and largest of its kind, currently delivering hyperlocal air quality data analysis and visualization for entire cities and regions. It's the first time cutting-edge tech has been applied in this way, using a unique combination of science, innovation, and technology to address climate change and work toward equity."

The network has generated the world's largest dataset of ground-based observations of climate-changing emissions — a new resource for cities, where climate change emissions are rarely monitored at all, let alone at the hyperlocal level. We are positively impacting our industry by innovating groundbreaking air monitoring approaches and capturing air quality and greenhouse gas data at resolutions never before available. This data is essential, especially in a critical moment when billions of dollars are being invested in climate action — for all Americans, including those vulnerable communities who need it most. With a lens on equity in decision-making, our platform can support crucial Environmental Justice initiatives to drive tangible change."

Private investments are illiquid and are not subject to ongoing daily valuation. Accordingly, the actual realized returns on unrealized investments may differ materially from the statements on impact stated herein. Nothing contained in the document may be relied upon as a guarantee, promise, assurance or representation as to the future. There can be no assurance that any investment will be able to realize investments in a timely manner. Investments in impact-focused securities are speculative and involve significant risks, including the risk of loss of the entire investment. Such investment is only suitable for sophisticated investors and requires the financial ability and willingness to accept the high risks and the lack of liquidity inherent in such investment. Prospective investors must be prepared to bear such risks for an indefinite period of time. Past performance is not indicative of future performance.
